Summary

Made a train set for my brother that I can print once I get my 3d printer.

Tags: [train](#)

Please use given drawings to assemble the train chassis. Its all pretty similar. (Engine assembly drawing may not look the same)

Please use glue while connecting stuff to the rail

Do note: Every train type has its own custom chassis, wheels, wheel cover, body and any thing related to it.

Onshape link: <https://cad.onshape.com/documents/3fd70f174efb897763471627/w/8cbbf6e9b6c6da387cba6605/e/55a0ca130434636e7c3a9eaa?renderMode=0&uiState=6a353370cfd9af7f5351b502>

The wheels in the model fully turn properly as intended, and are all designed to be print in place, the tracks clip with each other nicely and the train curves like how it would in real life realistically. Additionally, the train is also very detailed and looks quite realistic with detachable containers. I have added grooves for those containers so they dont fall and slip off easily. The wheels are conical which is realistic to how it is in real life

This project was developed by a teenager for a non profit hackclub.
